Official Statement from Pronto

As a result of today's events, Robbie Miller, Pronto's Chief Safety Officer, will take the reigns as Pronto's Chief Executive Officer. Robbie is an experienced and respected autonomous vehicle industry veteran. Under his leadership, we will continue to deliver on our mission of bringing a new layer of safety to commercial trucking.

The criminal charges filed against Anthony relate exclusively to Lidar and do not in any way involve Pronto's ground-breaking technology. Of course, we are fully supportive of Anthony and his family during this period.

Pronto is a pioneer in the AV space. Our Copilot product is industry-defining and meaningfully improves safety for all highway users. Pronto's talented team remains devoted to our customers and partners and we are all fully committed to maintaining the momentum we have built over the past year.
